Education

eCornell | April 2026 - Present (Expected Completion July 2026)

Certificate of Web Design & Development

WeCanCodeIT | May 2022 - August 2022 | April 2023

Certificate of Software Development | SQL

University of Maryland, Baltimore County | August 2020 - December 2021

Coursework in Computer Science

Experience

General Merchandise & Remodel Team Leader

Target | March 2025 - Present

- Lead cross-functional team managing inventory, merchandising, and operations across multiple departments
- Execute large-scale operational projects, merchandising transitions, inventory resets, and process improvements
- Train and develop team members while fostering accountability, communications, and problem-solving skills
- Lead planogram execution, large-scale inventory resets, and new store setup operations at multiple store locations

Tech Consultant & Trainer

Target | January 2023 - February 2025

- Delivered hands-on technical advice and support for consumer electronics, smart home products, and accessories
- Assisted guests in identifying technology solutions based on their needs, improving satisfaction and driving sales

Projects

BullFit | *Java, JavaScript, Spring Boot, REST API, Spring Security, MySQL*

- Developed and deployed fitness tracking REST API with Railway at BullFitApp.com
- Implemented stateless JWT authentication with Spring Security covering registration, login, and token validation
- Designed a normalized relational schema across 10+ entities including users, exercises, splits, workout sessions, exercise logs, and personal records with Flyway managing versioned migrations
- Seeded a global exercise library of 50+ exercises and modeled flexible workout logging with automatic personal record detection

Apex Legends Character API | *Java, HTML, CSS, Spring Boot, Thymeleaf, Spring Security*

- Developed a secured REST API using Spring Boot to provide detailed Apex Legends character data
- Enforced authentication on all endpoints using JWT, demonstrating reusable Spring Security configuration

HabiTrack | *Java, HTML, CSS, Spring Boot, Git, Team Project*

- Collaborated on a full-stack habit tracking SPA using Java, Spring Boot, H2, HTML, CSS, and vanilla JavaScript
- Designed a habit classification system distinguishing “make” vs “break” habits with daily completion logging
- Presented to representatives from JP Morgan Chase and other companies at WeCanCodeIT capstone showcase

WordleSolver | *Java*

- Built a console application that accepts color coded Wordle guess feedback and filters a dictionary of valid words to surface the strongest candidate solutions each round
- Implemented constraint-based elimination logic that classifies letters as correct, misplaced, or absent to progressively narrow the solution space with each subsequent guess

Technical Skills

Languages: Java, JavaScript, HTML, CSS, SQL (MySQL)

Frameworks & Libraries: Spring Boot, Thymeleaf, Spring Security, Hibernate

Developer Tools & Workflow: Git, Maven, Flyway, Agile (Scrum)

Concepts & Architecture: REST API, JWT, MVC, Object-Oriented Programming (OOP), Responsive Design
